Happy New Year

STARHILL FOREST
PETERSBURG, IL

VOLUME 26,
NO. 4 JANUARY 2010
Dear Members,

Thank you for the material submitted over recent months. I could always use more. Too much is far better than not having enough to fill these pages. There are, of course, deadlines to meet. July 1st, October 1st, January 1st, and April 1st.

I hope you enjoy the newsletters and always welcome suggestions for improvement and content. Thank you for your input.

Sincerely,
Mike Tyner  windfirerain@comcast.net
Editor

P. S. It is really very convenient to receive material via e-mail. That saves this poor typist a great deal of midnight hours. When sending items please be sure the subject line of your e-mail begins with “Harbinger”. That way a simple sort when doing my editor work will take me directly to the best news, views and photos in the INPS world.
Starhill Forest Arboretum is a scientific plant collection begun in 1976 by Guy and Edie Sternberg near Petersburg, Illinois. The mission of Starhill Forest is to promote an understanding and appreciation of trees and nature through programs that integrate science and the liberal arts. Focus is directed toward native landscapes and well-documented plant collections arranged aesthetically and ecologically in a naturalistic design for professional and public study and quiet enjoyment. Values sought include conservation, aesthetics, inspiration, natural heritage management, and advancing knowledge.

The living collections comprise taxonomic (generally genus-specific) collections as well as habit-specific, habitat-specific, aesthetic, and other collections. Categories include hardy woody plants, herbaceous plants, non-hardy (conservatory) plants, and natural habitat communities. All living collections in the arboretum are displayed within an aesthetically pleasing informal garden context and/or a natural-appearing, ecologically sound, sustainable habitat. The oak (Quercus) collection is designated as a national reference collection for North America by the North American Plant Collections Consortium (NAPCC) and is recognized worldwide. Approximately 150 other genera are also accessioned at Starhill Forest.

Starhill Forest is managed under a trust agreement for Illinois College (IC), and eventually will be transferred in fee simple to IC. Students already use the arboretum for internships, field classes, and special projects. This partnership is so successful that it has earned the Friends of Illinois College award presented by the IC Alumni Association and the State Journal-Register’s Frank Bellrose Award.

Friends of Starhill Forest is a non-profit organization recently incorporated to support the mission of the arboretum. Memberships are award for financial contributions and/or volunteer service, and benefits include special programs, rare plants, logo shirts, hand-made walking sticks, and the satisfaction of participating in a worthy cause. For more information about the Friends contact StarhillForest@aol.com.

Learn More about Volunteer Opportunities at Starhill Forest Arboretum

The Friends of Starhill Forest will host a volunteer opportunity orientation at 9 AM on Saturday, March 13 at Starhill Forest Arboretum.

Learn more about the various volunteer opportunities available at Starhill Forest....guiding short topic-specific tours for lay visitors; helping maintain herbaceous plantings; grounds maintenance; fundraising; helping with special events; records keeping, mailings, and newsletters; and more.

After lunch, those interested in being trained to guide one or more of five short walking tours will have time to learn more about them. The walking tours are intended for the lay public and not for tree or horticultural "experts". Guy and Mindy will continue to respond to those requests.

An agenda for March 13 will be distributed in February. If you know someone who might be interested in volunteering, let us know. In the meantime, we'll be happy to answer any questions.

Thank you.
The Illinois Specialty Crops, Agritourism and Organic Conference, held in Springfield, focused on the needs of the producers of crops beyond the usual corn and beans of Illinois. The group represents organic, or not, orchardists, nut growers, beekeepers, herb farms and vegetable growers. A highly diverse, sustainably driven, family farm seems to be the norm.

This type of agriculture is, I hope, the cutting edge and future of food production: more local, much fresher products. I won’t go into the issues of feeding the world. The take-home message is that sustainable food producers are complementary to managing natural resources. Who wouldn’t want sustainable orientated neighbors surrounding a preserve? Finding and using these producers should be encouraged.

The other event I attended was the Mid-America Horticulture Trade Show in Chicago. This trade show has been for years the place where folks in the mid-west went to see and learn about the newest in plant varieties and landscape techniques. This year, one of the pre-conference workshops was Sustainable Landscape Solutions: From the Soil Up to the Greenroof, sponsored by the Illinois Landscape Contractors Association. The speakers were among the leaders in innovative landscaping in the Chicago area.

The take home message from the day-long workshop was that sustainable landscape design involves creating an ecosystem. The ecosystem begins by healing and caring for soils damaged by construction and valuing the water as a resource to be used on-site. The workshop stressed the need to use native plants in the design as the most sustainable choice. To see a roomful of landscapers, caring enough about being in the forefront of design and technique, dutifully making a note to buy Plants of the Chicago Region by Swink & Wilhelm made this INPS member happy.

Two more days had break-out sessions dealing with sustainable design and native plants. Again I was in a packed room seeing people jotting down two book titles, Plants of the Chicago Region and Bringing Nature Home by Douglas W. Tallamy. The website to see details of the conference is: http://www.midam.org/index.html.

So here we are, native plants and sustainability becoming the cutting edge in agriculture and horticulture. This could mean that, as INPS members, we need to remember we can be a resource for so many folks wanting to learn about native plants. This is another thing to ponder on cold winter days.
PLANNING FOR LATE WINTER IN SOUTHERN ILLINOIS

Ben Dolbeare and Becky Croteau have reserved Wicker House at Horseshoe Lake for Feb. 25, 26, 27, 28 Mar. 1, 2010.

We have the Wicker House facility reserved for the weekend of February 27/28th. Participants may arrive as early as Thursday the 25th, and leave as late as March 1st. Guided field trips will be scheduled for Saturday and Sunday. The Southern Illinois Chapter is going to coordinate some activities with us.

We are extending the invitation for their members and others from throughout the state to also join us, at Wicker House, if they wish to.

Participants who will be joining us should call or email Becky Croteau
217-786-2369
becky.croteau@illc.edu
to confirm your intention to go on this trip. This will help us coordinate meals, and other details.
CHAPTER’S CALENDAR OF EVENTS

Central Chapter
February 11th  Mexico: Oaks, Weeds and more
Henry Eilers
Washington Park Botanical Garden
February 25th to March 1st  Wicker House Trip
Horseshoe Lake Union County
Details in elsewhere in newsletter

For detailed information about meetings and directions, contact Beth Adams at eadams21@hotmail.com

Irene Cull Chapter
Contact Mary Hartley for upcoming chapter events at 309/995-3356 or e-mail at haywool@winco.net

Southern Chapter
Upcoming Schedule:
Next southern chapter board meeting is February 9th
Regular monthly meeting is February 16th – inform members of rendezvous with central chapter at end of month.
Rendezvous with central chapter at Wicker House at Horseshoe Lake, February 25th – March 1st
Arrange speaker for March 16th regular meeting
Put on a plant collecting and vouchering workshop for April 20th regular meeting
Staff a booth for INPS at NatureFest on April 24th, create wildflower picturebook, have postcards, brochures, and membership applications for distribution
Organize a spring social at Trail of Tears State Forest for May 1st and create Natural History of Spring Ephemerals document for use in plant ID
Sponsor Microstegium Summit in August

Northeast Chapter
For upcoming meetings, contact Floyd Catchpole at 815/603-5190 or e-mail him at j9-catchpole@comcast.net
AnnualMeeting for the Northeast Chapter April 18, 3:00pm to 4:30pm at the Iron Oaks Environmental Learning Center, Olympia Fields, IL, more details to come.
Tentative Fieldtrip Schedule 2010 The fieldtrips are not sponsored financially by the NE Chapter. All arrangements to the trips will be on your own or with other people planning to attend. The trips are geared to provide at look at different sand communities in Indiana and northern Illinois, excluding sands along Lake Michigan. The trip will be weekend trips with camping available. We hope to also see members from other INPS chapters as the sites cover the northern half of the state. The actual sites to be visited and overall order of the sites are not yet finalized. Nothing is set in stone.
May 15/16 Indiana Sands Camp at Tippecanoe State Park in Indiana. Visit preserves in Newton, Jasper & Pulaski counties.
May/June, State Annual Meeting
July 17/18 Central Illinois Sands Camp at Sand Ridge State Forest. Visit Sand Prairie Scrub Oak NP, Henry Alan Gleason NP and others to be determined.
October 4 Southern Cook County Sands No camping Visit Indian Boundary Prairies, Sand Ridge NP, Thornton-Lansing NP and Jurgenson Woods.

Quad City Chapter
For upcoming meetings, check out their website http://qc_inps.home.mchsi.com

Forest Glen Chapter
Contact Connie Cunningham for details at carrollc@inh.siu.edu or 217/733-2660.

Gardeners' Day
Saturday, March 20, 2010, 8:00 am to 12:05 pm
University of Illinois Extension   Sangamon-Menard Unit
Building #30   Illinois State Fairgrounds   Springfield, IL
JANUARY/FEBRUARY  
MEMBERSHIP RENEWAL TME

Illinois Native Plant Society is totally membership based.

Every facet of our organization is built upon member/volunteer participation. The Erigenia, Harbinger, chapter newsletters, plant sales, programs, web sites, field trips, monthly and annual meetings, etc., are planned and prepared by members and volunteers. So in January we ask all members to renew their memberships to support these activities.

In fact, many members have already sent in renewals. Renewals received since about September are considered to be for the new year, ASSUMING DUES WERE PAID FOR THE CURRENT YEAR.

ALL UNRENEWED MEMBERSHIPS WILL BE PURGED FROM THE DATA BASE IN APRIL.
THE APRIL HARBINGER WILL CARRY A NOTIFICATION IF YOU ARE UNRENEWED.

It is our hope to be able to accomplish member renewals without the cost of sending membership notices in a separate mailing, if possible.

RENEW TODAY!!
RENEW TODAY!!!!
RENEW TODAY!!!!!!!
SEE MEMBERSHIP FORM ON LAST PAGE.
Please complete the entire form. Thank You!!!
WOULD YOU LIKE TO RECEIVE YOUR HARBINGER ELECTRONICALLY

IF YOU HAVE RECEIVED THIS ISSUE AS A PDF IT IS BECAUSE YOU REQUESTED IT THAT WAY OR BECAUSE IT IS BEING SENT THAT WAY FOR YOU TO SEE HOW IT WILL BE ARRIVING.

If you have not requested it be sent by PDF you will receive a hard copy as well.

If you would like to have it as a PDF please advise the Editor by email at windfirerain@comcast.net Please use Subject ---“PDF Harbinger”

Making this choice will save INPS $2000.00 to $3000.00 per year in Harbinger postage/printing costs.

If you wished you could then print out your own copy.

In addition, all members should send their current e-mail address to windfirerain@comcast.net Please use Subject---“INPS EMAIL”

Harbinger by mail will be black and white—PDF versions will be in full color.

ALL EMAIL DISTRIBUTIONS OF HARBINGER OR OTHER NOTICES WILL BE SENT USING “BCC” BLIND CARBON COPY TO PROTECT EVERYONE’S EMAIL FROM THOSE SPAMMERS OUT THERE.
